

INDEX for Volume 29

The following index, for the issues of January-December 1965, has been condensed, but contains reference by month to every feature article that appeared in the whole of volume 29. This is the first time in the magazine's history that an index has been prepared, printed, and bound into the last (December) issue of a volume. The editors believe that this practical reference, made available to *all* readers, will offset the longer version previously issued as a separate signature.
